

AESOP UNDER ATTACK - TROLL ALERT!

AESOP is trailed by Trolls. One anonymous individual (calling himself a “Physics Review Board”) persists in publishing libelous rants – a few facts cobbled together with lies and distortions.

Business loan debts are from earlier companies. (Although not legally required) AESOP Energy has publicly stated that such investors can convert into new equity. (See the last line in the Executive Summary).

AESOP’s breakthrough technology 28 years in the making is further denigrated by this troll. Joe Romm, former head of Renewable Energy at the USDOE, has stated that new science typically takes 20 to 30 years before it results in practical products.

The Second Law of Thermodynamics has been expanded by new science. Ken Rauen, AESOP’s Chief Scientist and CTO has contributed to that achievement. See: aesopinstitute.org

Professor Daniel Sheehan at the University of San Diego, (specialist in Thermodynamics) confirms the science behind Rauen’s fuel-free engines.

AESOP’s technologies are slated to be verified and validated by a distinguished independent lab.

AESOP’s former companies completed 4 Government (Department of Defense) contracts. The final Reports are available upon request. They prove the viability of AESOP’s work. (The Troll directly lies about the Government’s scientists’ stamp of approval.).

Nikola Tesla wrote: “In this present world ...a revolutionary idea or invention is hampered – by selfish interests, pedantry, stupidity and ignorance. It is attacked and stifled and passes through bitter trials and tribulations. ... All that was great in the past was ridiculed, condemned, combated, suppressed, only to emerge all the more powerfully, all the more triumphantly from the struggle.”

My bio is on the aesopinstitute.org website. I’m available for any questions.

Mark Goldes
Chairman & CEO, AESOP Institute & Chairman, AESOP Energy LLC
