## EPISODE 1

### The True History of Chemotherapy and the Pharmaceutical Monopoly

**00:27 Ty Bollinger** - Introduction

**6:26 Dr. Ivars Kalvins** - 1 in 2 men and 1 in 3 women will have cancer in this generation.

**7:37 Dr. Jonathan V Wright, Gaston Cornu-Laba, 1 other doctor** - Nutrition in their studies: Only one hour in 4 years, not much, nothing on nutrition

**8:35 Dr. Jonathan V Wright** - Taught hours and hours on patented drugs.

**8: 53 Dr. Irvin Sahni** - They don't get paid to educate people they get paid to write prescriptions.

**9:00 Garry F. Gordon** - The doctors are brainwashed when they get out of medical school to use the latest drug.

**9:17 D. Joseph Mercola** - Carnegie & Rockefeller Foundations engineered the curriculum.

**9:37 Ty Bollinger** - Flexner Report 1910

**10:02 Edward Griffin** - Reforming medical education according to Carnegie & Rockefeller.

**10:34 Dr. Robert Scott Bell** - In the beginning there wasn't one way of healthcare. Carnegie & Rockefeller created a monopoly to patent petrochemical medical education (Flexner Report 1910)

**11:18 Dr. Darrell Wolfe** - The Flexner report explained that most schools weren't truly teaching medicine because they weren't pushing enough chemical drugs manufactured by Carnegie & Rockefeller. This resulted in the AMA shutting down the largest homeopathic colleges while Carnegie & Rockefeller financially supported drug intensive medicine.

**12:04 Edward Griffin** - After Carnegie & Rockefeller donated the money they started to make members of their staff appointed to the board of directors to the donors' boards and teaching centers which made the curriculum swing in the direction of pharmaceutical drugs.

**15:14 Aleksandra Niedzwiecki** - The monopoly is the way they protect and grow the medical business.

**15:45 Dr. Jonathan V. Wright** - Blockbuster drugs seems to have their number one goal is to make money.

## THE TRUTH ABOUT CANCER: A GLOBAL QUEST

**16:08 Dr. Matthias Rath** - Cancer is just one element of this unspeakable business of defining diseases as a marketplace.

**17:21 Ty Bollinger** - Every business has the same goal to grow the business, eliminate competition, and to maintain the monopoly. This business like to eliminate the "quacks" or competition.

**18:09 Dr. Sunil Pai** - Chemotherapy comes from the history of mustard gas.

**18:43 Ty Bollinger** - Summarizes what we learned about mustard gas and chemotherapy.

**19:07 Dr. Sunil Pai** - 90% of physicians would not prescribe the drug to their wife or their child.

**19:18 unknown** - "He's not going to do his treatment. Why would you?"

**19:22 Ty Bollinger** - Why is this "War on Cancer" still continuing?

**19:36 Aleksandra Niedzwiecki** - The money being made is why this war is ongoing. The chemicals they use generate new cancer cells and don't eliminate cancer.

**20:50 Ty Bollinger** - Maybe oncologist won't take these therapies is because they cause cancer.

**21:09: Dr. Veronique Desaulniers** - Tamoxifen is one of the primary drugs to fight breast cancer. Tamoxifen is classified as a carcinogen by the American Cancer Society and the World Health Organization.

**21:31 Ty Bollinger** - Summary on Tamoxifen. What about other cancer causing drug?

**21:40 Dr. Ben Johnson** - It's estimated that by 2020 more than half of American's will have medically induced cancer.

**21:55 21:31 Dr. Rashid Buttar** - 42-46% of patients will die of cachexia. 58-54 percent don't die of it, but the rest of them die from the treatment.

**22:41 James Forsythe** - 2.1% survival rate after 5 years of chemo treatments.

**23:02 Bob Wright** - 97% of people who undergo chemotherapy are dead in 5 years. That study was in the 2004 edition of the Journal of Oncology.

**24:12 Dr. Rashid Buttar** - Chemo is like using napalm to get rid of an ant problem. You'll kill the ants and every form of life it touches. Normal cells and cancer cells alike will die.

**26:00 Ty Bollinger** - Even though it doesn't make sense to use a substance that will create cancer to treat cancer doctors can lose their licenses if they don't recommend it.

**26:14 Boris Grinblat** - Oncologist are not free to offer good treatments.

**26:46 Dr. Joseph Mercola** - The doctors that start to embrace alternative methods become ostracized.

**27:15 Dr. Bitu Badakhshan** - It's against the law in California to even recommend integrated medicine.

**27:26 Laura Bond** - Doctors in the US, UK, and Australia can lose their licenses if they recommend anything but the "Gold Standard"--Chemotherapy and radiotherapy.

**28:17 Ty Bollinger** - Chemotherapy stimulates cancer stem cells. What is a stem cell? What does it have to do with cancer?

**28:25 Russell Blaylock** - Only stem cells seem to be the source of cancer. They are primitive cells that haven't really decided what they want to be yet like brain cells or lung cells. If you damage the DNA of a stem cell then it will become immortal and produce more and more cells.

**31:05 Dr. Bitu Badakhshan** - Chemo makes cancer more resistant.

**31:23 Sayer Ji** Chemo can shrink a tumor, but it will cause an enrichment of a tumor cell that's beneath the tumor, or cancer stem cell.

**32:51 Ty Bollinger** - Everyone will have adverse effects from chemo and radiation. Despite that many doctors can lose their license if they don't prescribe chemo and radiation.

**33:32 Aleksandra Niedzwiecki** - The side effects from these therapies can cause someone to need a bone marrow transplant, bleeding from the intestines that needs a prescription drug. So they profit off prescribing more drugs and they keep growing their business.

**34:19 Chris Wark** - Chemotherapy causes more problems than helps.

**34:52 A.J. Lanigan** - Our immune system is key in getting over cancer. Chemo kills your immune system. They should be pouring money into immunotherapy.

**36:22 Dr. Matthias Rath** - Doctors don't know that it's a huge fraud, but every scientist knows that it is a huge fraud!

## THE TRUTH ABOUT CANCER: A GLOBAL QUEST

**37:28 Ty Bollinger** - The immune system is the key to fighting cancer. Oncologist can make “kickbacks” for prescribing certain chemotherapy drugs. This is unique in the pharmaceutical industry that doesn’t apply anywhere else.

**38:13 Sunil Pai** - The average patient spends between \$10,000-\$30,000 per month just for the chemotherapy agents that they are using. Doctors get “reimbursements” but it is basically a kickback. This is the only field in oncological care that gets these types of reimbursements.

**39:48 Irvin Sahni** - Oncology is a very lucrative business.

**39:55 Ty Bollinger** - Farid Fata prescribed cancer treatments to people who didn’t even have cancer. Could it be because of the kickbacks?

**40:17 Dr. Irvin Sahni** - When you think of Farid Fata you think of mass murderers, but in sense he’s worse because you never saw him coming.

**41:20 Mike Adams** - The disturbing things isn’t that Farid Fata was caught, but that there are others who haven’t been caught.

**42:46 Ty Bollinger** - We must question our doctors and educate ourselves.

**43:29 Burton Goldberg** - The agencies that were designed to protect humanity are protecting the industry that they are supposed to be protecting us from.

**43:44 Jon Rappoport** - Any drug that is on the market today was approved by the FDA. If it is later proven to have adverse effects, it was either hidden from the public or was not tested thoroughly enough.

**44:13 Ty Bollinger** - On the FDA’s own website, it declares there are 100,000 deaths each year from “properly prescribed” drugs.

**44:39 Sayer Ji** - The purpose of the industry is to spend billions to develop synthetic drugs so a patent can be made. In the process natural remedies are found to be superior, but unable to secure a patent, therefore, those studies showing their superiority are not published.

**45:38 Ty Bollinger** - The system is rigged.

**45:52 Dr. Russell Blaylock** - Pharmaceutical companies will have written “ghost” articles that have no studies behind them, and will entice a number of doctors to endorse them with the promise of having their name in a prestigious journal. Other doctors will then see that this medication is backed by a number of good doctors.

**47:26 Dr. Robert Gorter** - The FDA approved an antibiotic without the studies being done. It was a scandal that received no attention.

**47:45 Anonymous Doctor** - Clinical trial companies “groom” doctors to help them falsify information behind the approval of a drug by helping them with their education in return for joining them. If the FDA says something doesn’t work, they can throw money at people and have it approved as a “miracle drug” in a matter of months.

**49:18 Ty Bollinger** - Falsifying information about toxic drugs is only the tip of the iceberg.

**49:38 Dr. Matthias Rath** - Bayer, BASF, Hoechst and other pharmaceutical companies had massive amounts of slaves working an enormous factory which gave way to the Auschwitz camp during the holocaust. These camps were created to supply slave labor to these companies.

**52:55 Ty Bollinger** - “Big Pharma” sacrificed millions of people for their own gain, and they will do it again.

**53:30 Dr. Matthias Rath** - In the archives at the National Library of Congress there was a case against Bayer, BASF and other companies as war crimes. They were responsible for the death of 60 million people.

**56:20 Jonathan V. Wright** - Patented medicines have similarities to what the body needs along with other substances that cause major damage and have no place in medicine.

**57:01 Dr. Nalini Chilcov** - You can’t patent nature, so there isn’t a lot of money in plant medicine.

**57:15 Mike Adams** - You can’t isolate compounds from nature and expect them to work the same. Holistic medicine is cheaper, safer and more effective.

**57:40 Dr. Patrick Quillin** - Nature, to be commanded, must be obeyed. Since it can’t be patented, companies try to mimic what nature provides already in order to make money.

**58:40 Dr. Stanislaw Burzynski** - The Texas Medical Board is suing everyone for not using conventional cancer treatment.

**58:52 Ty Bollinger** - The war on cancer is actually more like a war against anyone willing to use medicine contrary to the conventional cancer treatments.

**59:15 Dr. Jonathan Wright.** - In 1992 the King County Sheriff's Department raided clinic and found nothing. The Fitzgerald report was written to expose that there was a conspiracy to prevent natural cancer treatment.

**1:05:39 Dr. Joseph Mercola** - Unconventional approaches are suppressed due to lack of funding.

## THE TRUTH ABOUT CANCER: A GLOBAL QUEST

**1:07:13 Dr Stanislaw Burzynski** - Texas Medical Board harassed him for not using standard treatment even with great results.

**1:07:55 Dr. Rashid Buttar** - It is irrelevant if the care works or not, as long as it is the standard.

**1:08:21 Dr. Tullio Simoncini** - There is a fear of jail and persecution in holistic medicine. Any new discovery makes old ways useless.

**1:09:25 Dr Stanislaw Burzynski** - It is hard to treat advanced patients because of the harassment and persecution.

**1:10:22 Dr. Rob Verkerk** - If you are a doctor who uses a natural approach you are running a risk. If not a doctor, you may be arrested. It is a fundamental loss of rights to not be allowed to provide patients what they need.

**1:11:26 Dr. Patrick Vickers** - AMA guilty of conspiracy against chiropractic work.

**1:12:40 Ty Bollinger** - Jason Vale went to jail for selling apricot seeds on a website.

**1:13:05 R. Webster Kehr** - Wright developed a cure for cancer cells

**1:13:39 Jonathan Wright** - A dissonant frequency was sent in and the bacteria was killed and cancer was cured.

**1:15:07 R. Webster Kehr** - The AMA tried to buy him out, so the FDA ruined his lab

**1:15:29 Ty Bollinger** - Harry Hoxey persecuted for treating cancer naturally. Hoxey tonic is still being used.

**1:16:25 Liz Jonas** - Her sister worked for Hoxey and her mom was saved by Hoxey. The AMA wanted to buy his work and bury it.

**1:20:23 Dr. Elias Gutierrez** - Hoxey formula selectively targets bad cells. All treatments and supplies are done in 1 day with checkups every 6 months to a year.

**1:22:21 David Olson** - Was given 3 days to 3 months to live. Dr. Gutierrez treated him and has been cancer free for more than 8 years.

**1:25:50 Ty Bollinger** - The entire medical system has been hijacked. The number one goal is the bottom line for the companies.

**1:27:04 Dr. Subrata Chakravarty** - He only ever heard about the "shareholders".

**1:27:27 Tara Mann** - Watched a documentary about natural treatment that changed her life- Gerson Therapy.

## THE TRUTH ABOUT CANCER: A GLOBAL QUEST

**1:29:46 Ty Bollinger** - Tara Mann founded "Cancer Crackdown".

**1:30:23 Gaston Cornu-Labat** - Doctors force patients to do traditional treatment.

**1:31:23 Mike Adams** - "Scientific totalitarianism", parental rights are being violated.

**1:32:22 Chris Wark** - Parents have to run or choose chemo.

**1:32:38 Ty Bollinger** - Will the government really take your children?

**1:32:40 Jay Mathews** - His daughter was diagnosed and they forced him to do treatments to her or he would lose custody. The state took her and she lost her arm.

**1:36:49 Todd Jones** - Forced treatments are traumatic. Statutes of the Law aren't upheld.

**1:38:45 Cassandra Callender** - DCFS workers took her from her house and forced her to do treatments.

**1:40:28 Dr.. Rashid Buttar** - How is this different than Nazi Germany?

**1:41:07 Mike Adams** - This is incompatible with a free society.

**1:41:26 Dr. Rashid Buttar** - This is the beginning of letting ourselves be ruled by tyranny.

**1:41:47 Matthias Rath** - This is a modern concentration camp. This is psychological warfare.

**1:44:42 Ty Bollinger** - Our goal is to eradicate cancer once and for all. Cancer is not a death sentence.

**1:45:12 Pamela Kelsey** - Had pancreatic cancer was told she had 1.5 years to live. She chose alternative therapy and conquered cancer within a year. 40 years have passed and she is cancer free.

**1:51:07 Ty Bollinger** - Episode 1 Summary.
