

AESOP Institute

Mark Goldes

AESOP Energy LLC

Curriculum Vitae

Founded AESOP Institute 1973. Evaluated hundreds of energy generating inventions. A very small number are extraordinarily promising. Included in that latter group are piston engines, turbines and solid-state generators designed to run on ambient atmospheric heat. The stored heat of the atmosphere can substitute for fuel – demonstrated by conversion of a Ford engine. This huge reservoir of stored solar energy, much larger than Earth's fossil fuel reserves, can be tapped for power. This is the missing key to rapid replacement of fossil fuels.

SunWind Ltd. became the first commercial affiliate of AESOP Institute in 1985. It was superseded by Magnetic Power Inc. which launched Room Temperature Superconductors Inc., as a subsidiary, in 1993. The revolutionary, pioneering work of both the latter firms opened doors to potentially very inexpensive, remarkable, green energy breakthroughs under development by AESOP Energy LLC.

Addressed four annual Global Superconductivity Conferences, two National Renewable Energy Laboratory (NREL) Enterprise Forums, and the 2004 Arlington Institute Conference on Breakthrough Technologies for the World's Biggest Problems. Nominated for the 2006 World Technology Award in Energy.

Studied Electrical Engineering at the Polytechnic University of New York and California Polytechnic State University at San Luis Obispo, CA

BA 1953, MA 1957, San Francisco State University

Executive Trainee, Ampex Corporation 1954

Reserve Officer, United States Air Force 1953–60. 1955-56 Senior Director of the radar station controlling the primary air corridor from West Germany to Berlin.

Second MA & Fellow 1956-1958, Graduate Program in the History of Ideas, Brandeis University

Executive Project Manager, Volt Information Sciences 1958-1959 San Francisco

Faculty, Monterey Peninsula College 1959

Founded Emerson College of the Monterey Peninsula 1960

Managed my own Real Estate office 1962-1967 Big Sur, California

Economic Development Consultant to U.S. Senator Robert F. Kennedy 1968

Chief, Housing & Economic Development, City of Oakland, California 1969-71

Founder & CEO The AESOP Company, (Economic Consulting) Oakland, California, 1972. Co-authored the Human Investment Tax Credit for the Economic Development Administration (U.S.

Department of Commerce). This provided the background for the 1977 Jobs Tax Credit passed by the U.S. Congress - which created 2 million jobs.
