

William Cooper purports to publish portions of “Silent Weapons” in his own book. Note that Cooper’s dates conflict with Van Dyke’s dates. Note also that Cooper’s version FULLY IDENTIFIES the elite whereas Van Dyke’s version DID NOT.

Silent Weapons for Quiet Wars

An introductory programming manual

Operations Research

Technical Manual

TM-SW7905.1

WELCOME ABOARD

This publication marks the 25th anniversary of the Third World War, called the "Quiet War," being conducted using subjective biological warfare, fought with "silent weapons."

This book contains an introductory description of this war, its strategies, and its weaponry.

SECURITY

It is patently impossible to discuss social engineering or the automation of a society, i.e., the engineering of social automation systems (SILENT WEAPONS) on a NATIONAL or WORLDWIDE SCALE without implying extensive OBJECTIVES of SOCIAL CONTROL and DESTRUCTION OF HUMAN LIFE, i.e., SLAVERY and GENOCIDE.

This manual is in itself an analog declaration of intent. Such a writing must be SECURED FROM PUBLIC SCRUTINY. Otherwise, it might be recognized as a TECHNICALLY FORMAL DECLARATION OF DOMESTIC WAR. Furthermore, whenever any person or group of persons in a

tion (data), so a high-speed computerized data-processing system was necessary which could race ahead of the society and predict when society would arrive for capitulation.

Relay computers were too slow, but the electronic computer, invented in 1946 by J. Presper Eckert and John W. Mauchly, filled the bill.

The next breakthrough was the development of the simplex method of linear programming in 1947 by the mathematician George B. Dantzig.

Then in 1948, the transistor, invented by J. Bardeen, W. H. Brattain, and W. Shockley, promised great expansion of the computer field by reducing space and power requirements.

With these three inventions under their direction, those in positions of power strongly suspected that it was possible for them to control the whole world with the push of a button.

Immediately, the ROCKEFELLER FOUNDATION got in on the ground floor by making a four-year grant to HARVARD COLLEGE, funding the HARVARD ECONOMIC RESEARCH PROJECT for the study of the structure of the American economy. One year later, in 1949, THE UNITED STATES AIR FORCE joined in.

In 1952 the original grant period terminated, and a high-level meeting of the ELITE [Illuminati] was held to determine the next phase of social operations research. The Harvard project had been very fruitful, as is borne out by the publication of some of its results in 1953 suggesting the feasibility of economic (social) engineering. (*Studies in the Structure of the American Economy* — copyright 1953 by Wassily Leontief, International Sciences Press Inc., White Plains, New York.)

Engineered in the last half of the decade of the 1940s, the new Quiet War machine stood, so to speak, in sparkling gold-plated hardware on the showroom floor by 1954.

With the creation of the maser in 1954, the promise of unlocking UN LIMITED SOURCES OF FUSION ATOMIC ENERGY FROM THE HEAVY HYDROGEN IN SEA WATER and the consequent availability of unlimited social power was a possibility only decades away.

The combination was irresistible.

The QUIET WAR was quietly DECLARED by the INTERNATIONAL ELITE [THE BILDERBERG GROUP] at a meeting held in 1954.

Although the silent weapons system was nearly exposed 13 years later, the evolution of the new weapon-system has never suffered any major setbacks.

This volume marks the 25th anniversary of the beginning of the Quiet War. Already this domestic war has had many victories on many fronts throughout the world.

crack up.

Therefore, the silent weapon is a type of biological warfare. It attacks the vitality, options, and mobility of the individuals of a society by knowing, understanding, manipulating, and attacking their sources of natural and social energy, and their physical, mental, and emotional strengths and weaknesses.

THEORETICAL INTRODUCTION

*Give me control over a nation's currency,
and I care not who makes its laws.*

Mayer Amschel Rothschild

(1743 - 1812)

Today's silent weapons technology is an outgrowth of a simple idea discovered, succinctly expressed, and effectively applied by the quoted Mr. Mayer Amschel Rothschild. Mr. Rothschild discovered the missing passive component of economic theory known as economic inductance. He, of course, did not think of his discovery in these 20th-century terms, and, to be sure, mathematical analysis had to wait for the Second Industrial Revolution, the rise of the theory of mechanics and electronics, and finally, the invention of the electronic computer before it could be effectively applied in the control of the world economy.

GENERAL ENERGY CONCEPTS

In the study of energy systems, there always appear three elementary concepts. These are potential energy, kinetic energy, and energy dissipation. And corresponding to these concepts, there are three idealized, essentially pure physical counterparts called passive components.

(1) In the science of physical mechanics, the phenomenon of potential energy is associated with a physical property called elasticity or stiffness, and can be represented by a stretched spring.

In electronic science, potential energy is stored in a capacitor instead of a spring. This property is called capacitance instead of elasticity or stiffness.

(2) In the science of physical mechanics, the phenomenon of kinetic energy is associated with a physical property called inertia or mass, and can be represented by a mass or a flywheel in motion.

In electronic science, kinetic energy is stored in an inductor (in a magnetic field) instead of a mass. This property is called inductance instead of inertia.

(3) In the science of physical mechanics, the phenomenon of energy

***** TOP SECRET *****

dissipation is associated with a physical property called friction or resistance, and can be represented by a dashpot or other device which converts system energy into heat.

In electronic science, dissipation of energy is performed by an element called either a resistor or a conductor, the term "resistor" being the one generally used to express the concept of friction, and the term "conductor" being generally used to describe a more ideal device (e.g., wire) employed to convey electronic energy efficiently from one location to another. The property of a resistance or conductor is measured as either resistance or conductance reciprocals.

In economics these three energy concepts are associated with:

- (1) Economic Capacitance — Capital (money, stock/inventory, investments in buildings and durables, etc.)
- (2) Economic Conductance — Goods (production flow coefficients)
- (3) Economic Inductance — Services (the influence of the population of industry on output)

All of the mathematical theory developed in the study of one energy system (e.g., mechanics, electronics, etc.) can be immediately applied in the study of any other energy system (e.g., economics).

MR. ROTHSCHILD'S ENERGY DISCOVERY

What Mr. Rothschild had discovered was the basic principle of power, influence, and control over people as applied to economics. That principle is "when you assume the appearance of power, people soon give it to you."

Mr. Rothschild had discovered that currency or deposit loan accounts had the required appearance of power that could be used to INDUCE PEOPLE [WC *emphasis*] (inductance, with people corresponding to a magnetic field) into surrendering their real wealth in exchange for a promise of greater wealth (instead of real compensation). They would put up real collateral in exchange for a loan of promissory notes. Mr. Rothschild found that he could issue more notes than he had backing for, so long as he had someone's stock of gold as a persuader to show to his customers.

Mr. Rothschild loaned his promissory notes to individuals and to governments. These would create overconfidence. Then he would make money scarce, tighten control of the system, and collect the collateral through the obligation of contracts. The cycle was then repeated. These pressures could be used to ignite a war. Then he would control the availability of currency to determine who would win the war. That government which agreed to give him control of its economic system got his support.

Collection of debts was guaranteed by economic aid to the enemy of the debtor. The profit derived from this economic methodology made Mr.

***** TOP SECRET *****

Rothschild all the more able to extend his wealth. He found that the public greed would allow currency to be printed by government order **BEYOND THE LIMITS [WC emphasis] (inflation) of backing in precious metal** or the production of goods and services (gross national product, GNP).

APPARENT CAPITAL AS "PAPER" INDUCTOR

In this structure, credit, presented as a pure element called "currency," has the appearance of capital, but is, in fact, negative capital. Hence, it has the appearance of service, but is, in fact, indebtedness or debt. It is therefore an economic inductance instead of an economic capacitance, and if balanced in no other way, will be balanced by the negation of population (war, genocide). The total goods and services represent real capital called the gross national product, and currency may be printed up to this level and still represent economic capacitance; but currency printed beyond this level is subtractive, represents the introduction of economic inductance, and constitutes notes of indebtedness.

War is therefore the balancing of the system by killing the true creditors (the public which we have taught to exchange true value for inflated currency) and falling back on whatever is left of the resources of nature and regeneration of those resources.

Mr. Rothschild had discovered that currency gave him the power to rearrange the economic structure to his own advantage, to shift economic inductance to those economic positions which would encourage the greatest economic instability and oscillation.

The final key to economic control had to wait until there was sufficient data and high-speed computing equipment to keep close watch on the economic oscillations created by price shocking and excess paper energy credits — paper inductance/inflation.

BREAKTHROUGH

The aviation field provided the greatest evolution in economic engineering by way of the mathematical theory of shock testing. In this process, a projectile is fired from an airframe on the ground and the impulse of the recoil is monitored by vibration transducers connected to the airframe and wired to chart recorders.

By studying the echoes or reflections of the recoil impulse in the airframe, it is possible to discover critical vibrations in the structure of the airframe which either vibrations of the engine or aeolian vibrations of the wings, or a combination of the two, might reinforce resulting in a resonant self-destruction of the airframe in flight as an aircraft. From the standpoint

***** TOP SECRET *****

As the transition becomes more difficult to manage, the family unit must be carefully disintegrated, and state-controlled public education and state-operated child-care centers must become more common and legally enforced so as to begin the detachment of the child from the mother and father at an earlier age. Inoculation of behavioral drugs [Ritalin] can speed the transition for the child (mandatory). CAUTION: A woman's impulsive anger can override her fear. An irate woman's power must never be underestimated, and her power over a pussy-whipped husband must likewise never be underestimated. It got women the vote in 1920.

FACTOR IV — JUNIOR

The emotional pressure for self-preservation during time of war and the self-serving attitude of the common herd that have an option to avoid the battlefield — if junior can be persuaded to go — is all of the pressure finally necessary to propel Johnny off to war. Their quiet blackmailings of him are the threats: "No sacrifice, no friends; no glory, no girlfriends."

FACTOR V — SISTER

And what about junior's sister? She is given all the good things of life by her father, and taught to expect the same from her future husband regardless of the price.

FACTOR VI — CATTLE

Those who will not use their brains are no better off than those who have no brains, and so this mindless school of jelly-fish, father, mother, son, and daughter, become useful beasts of burden or trainers of the same.

WC/Author's Note: So now you know. This chapter could only come in the beginning. Your preconceived ideas had to be shattered in order for you to understand the rest of this book. In this chapter you can see every step that the elite have taken in their war to control this once great nation. You can see the steps that will be taken in the future. You can no longer pretend innocence. Your denial of the conspiracy will fall on deaf ears. This book is part of the education that will give Americans the weapons needed in the coming months and years of hardship as the New World Order struggles to be born.

Many will argue that "Silent Weapons for Quiet Wars" is only a bogus conglomeration of words for which the writer has never taken credit or responsibility. Those who do so ignore the self-evident truths contained within the document. They ignore these truths because they are an indictment of their own ignorance, which they cannot face. ?!!! BS!

The document, first found in 1969, correctly outlines events which subse-

quently came to pass. It cannot be ignored or dismissed. The document is genuine. Its truths cannot be negated or shrugged away. The message is this: You must accept that you have been cattle and the ultimate consequence of being cattle — which is slavery — or you must prepare to fight, and if necessary die to preserve your God-given right to Freedom.

That last sentence is the real reason why people choose to ignore "Silent Weapons for Quiet Wars." People are not ready to admit that they have been cattle. They are not prepared to fight, and if necessary die, for Freedom. It is an indictment of the citizens of the United States of America. And that is the total confirmation of the truth of the information contained in "Silent Weapons for Quiet Wars."
